Subject: Environmental Scientist Position at the Office of Information Management and Assessment

California Water Quality Monitoring Council

Job opportunity for analytical chemist/data scientist in the Office of Information Management and Assessment

We are hiring an analytical chemist/data scientist in the Surface Water Ambient Monitoring Program Information Management and Quality Assurance (SWAMP IQ) unit. Join a dynamic team of environmental scientists working on data management and quality assurance for monitoring data covering the entire State of California. Responsibilities for this position include:

- Serving as a technical resource and coordinator for chemical laboratory services
- Developing project management tools, monitoring designs, and quality assurance and data management plans
- Providing guidance on appropriate methodology and quality assurance practices for monitoring projects
- Reviewing proposed standard operating procedures, method validation packages, intercalibration studies, and quality control data
- Working on data science projects such as developing machine learning products and business intelligence tools

For more information and to apply please see the vacancy announcement:
